

JOSÉ MARTINS

Senior Frontend Engineer

[linkedin.com/in/jmartinsmn](#) | martins.josemn@gmail.com | +55 61 9 8177-2154 | [github.com/JoseMMello](#)

PROFESSIONAL SUMMARY

Senior Frontend Engineer with **8+ years** of experience building high-performance, scalable web applications in e-commerce, fintech, and healthcare. Proven track record of driving business impact through web performance optimization (**+183% Core Web Vitals**), increasing conversion and revenue, and building data-driven features such as semantic search. Experienced in handling high-scale systems (**10M+ events/week**) and delivering AI-powered solutions, including LLM-based transcription and automation, improving operational efficiency and user experience. Strong focus on accessibility, performance, and real-world product impact.

TECHNICAL SKILLS

Frontend Development

React (Hooks, Context, Server Components), TypeScript, JavaScript (ES6+), Next.js, Remix, HTML5, CSS3, Tailwind CSS, Styled Components, Redux, Recoil, React Query, Component Libraries, Storybook

Web Performance & Quality

Core Web Vitals (LCP, FID, CLS), Lighthouse CI, Bundle Optimization (Tree-shaking, Code Splitting), Lazy Loading (Intersection Observer), CDN, Accessibility (WCAG 2.1 AA, ARIA), Vitest, Jest, Cypress

Architecture & Backend

Clean Architecture, Dependency Injection, Design Systems, SOLID Principles, Node.js, GraphQL, REST APIs, WebSockets (Socket.io), Microservices, Event-driven Architecture, Redis, PostgreSQL

AI & ML Integration

Production AI features (GPT-4, Claude API), RAG, semantic search with embeddings, LLM prompt engineering, streaming responses

Tools & DevOps

Git, GitLab CI/CD, GitHub Actions, AWS (Lambda, S3, CloudFront), Docker, containerized environments, Datadog, Monitoring & Observability, Vite, Webpack, Figma

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer — Swift (E-commerce)

Feb 2025 – Present

- Led performance optimization initiative improving Core Web Vitals from **30 to 85 (+183%)** through bundle splitting, lazy loading with Intersection Observer, and CDN optimization, directly contributing to **30% increase in conversion rates** and **\$1.2M additional annual revenue**
- Architected and shipped cashback rewards feature using React Server Components and TypeScript, implementing optimistic UI updates and real-time balance sync via WebSocket, driving **30% sales growth** and serving **500K+ active users** with **99.8% uptime**
- Built production AI-powered support chatbot using RAG with semantic search and streaming LLM responses, reducing support volume by **40%** and improving first-contact resolution by **65%**
- Elevated accessibility score from **60 → 100** using semantic HTML, ARIA labels, and keyboard navigation patterns compliant with WCAG 2.1 AA standards, expanding market reach by **15%**

React (Server Components) • TypeScript • Remix • Zod • Tailwind CSS • RAG • OpenAI API • AWS (Lambda, S3) • Vitest • Storybook

Senior Frontend Engineer — BBTS (Banco do Brasil Technology)

Jan 2023 – Mar 2025

- Led frontend development for enterprise messaging platform processing **10M+ emails/SMS weekly**, implementing React with Recoil for state management and building custom hooks for data fetching, maintaining **99.9% uptime** and serving **2,000+ internal users**
- Designed modular frontend architecture applying Clean Architecture principles with dependency injection patterns, feature-based folder structure, and custom build pipeline, reducing deployment time by **45%** and cutting bugs by **60%**
- Built comprehensive design system with compound components pattern, CSS-in-JS (styled-components), and Storybook documentation, ensuring consistency across **5+ applications** and reducing design-to-dev time by **40%**
- Implemented testing strategy with unit tests (Vitest), integration tests, and E2E tests (Cypress) maintaining **~90% coverage**, reducing production incidents by **65%**

React • TypeScript • Recoil • Zod • Clean Architecture • Vitest • Cypress • Styled Components • REST APIs • Datadog • GrapesJS

Senior Fullstack Developer — DrHoje (Telemedicine)

Oct 2020 – Feb 2023

- Built real-time telemedicine platform using React and Node.js microservices with GraphQL APIs, implementing WebRTC for video consultations and supporting **10K+ daily consultations**, reducing patient queue friction by **35%** and improving NPS from **62 to 78**
- Engineered AI-powered transcription system using GPT-4 API with structured prompts and streaming responses for automatic form-filling and medical summarization, accelerating documentation by **40%**
- Developed real-time monitoring dashboard using WebSocket (Socket.io) with Redis for event broadcasting and presence tracking, reducing consultation setup time by **25%**
- Built automated notification service using Twilio IVR/SMS with Node.js queue workers (Bull), increasing appointment attendance by **28%** and reducing no-show rate from **18% to 13%**

React • Node.js • Redux • Redux Saga • React Query • React Hook Form • GraphQL • WebSockets (Socket.io) • Redis • GPT-4 API • WebRTC • Twilio • Bull Queue • Datadog

Frontend Engineer — ENGIE (Energy Services)

Dec 2021 – Dec 2022

- Migrated legacy ASP frontend to modern React/TypeScript SPA with code-splitting and tree-shaking, reducing technical debt by **60%** and improving load times by **45%**
- Applied Clean Architecture principles with dependency injection and repository pattern, decoupling business logic from UI and reducing onboarding time by **50%**
- Implemented virtualized lists using react-window with windowing technique for **10K+ row datasets**, improving rendering performance by **70%**

React • TypeScript • CSS Modules • Clean Architecture • Webpack • react-window • Design Systems

Frontend Engineer — Keeggo (Educational SaaS)

Oct 2020 – Dec 2021

- Developed scalable features for SaaS platform using React, TypeScript, and Clean Architecture
- Implemented comprehensive testing suite achieving **85% coverage**, reducing production bugs by **40%**
- Delivered features with **95% sprint completion rate** across cross-functional teams

React • TypeScript • Jest • Cypress • Clean Architecture

EDUCATION

MBA in Artificial Intelligence Engineering (In Progress)

FullCycle | 2026 – Present

Technologist Degree in Systems Analysis and Development

IESB - Brazil | 2018 – 2022
